

Report on new requirements raised by the client in meetings on 07/08/24 & 08/08/24

- Instead of Parent Registration by manually entering details, the registration process is handled between client and provider.
- Add to favourites, email, phone and WhatsApp icons.
- On clicked on WhatsApp icon, automatically type a message including the details of course he has selected to kidgace's business account.
- A response saying provider will contact you must also be given in return.
- When academies try to create an account, It should send the details of the academy to the admin dashboard/via email which only on accepting will create the account of Business
- If a parent try to create an account, It should do the same. And a reply mail saying Thank you for registering and so and so.
- Search box design changes and its gonna be sticky just below header and also should be seen on all pages.
- Currently when click on a category it will lead to related academies and then classes under each academy(pebble reference),but now its going to be like, select a category first it leads to related course and there we can see the provider also.
- Also need to add basic amenities at the locationon the course details page
- Simplify view of admin dashboard.
